

Rubrite Flexible Abrasives

Rubrite flexible abrasive cleaning stones are excellent for removing surface imperfections from any metal. Mildly abrasive, they do only enough cutting to produce a high polish and fine finish. They are slow-wearing, non-loading, and will not gum or dust.

Recommended in commutator maintenance for periodic cleanup of surface, or for polishing the commutator after grinding with Diamond D commstones. They can also be recommended to provide a smooth, clean finish on machined parts, etc.

Size and Grade Selection

We make Rubrite in only one grade. When using on commutators and slip rings, we suggest you use as large a Rubrite as will easily fit between your brush riggings.

If you don't see the exact size you want, remember you can always special order size up to a maximum of 12" x 5" x 2". Please specify size and quantity for us to quote price and delivery.

• Unmounted

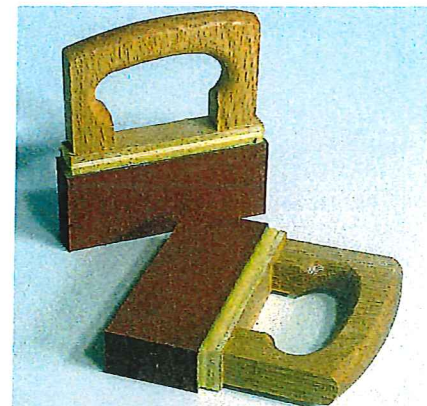

This type can be used for hundreds of jobs — including metal cleaning, commutator burnishing and rust removal. **Specify catalog number when ordering.**
